Hackathon Rules

Open Source: Repositories must be public.

Team Size: 1 maximum of four people. Hackathon is a fast-paced, intensive experience.

Demo Requirements: Your demo must only highlight the core features, code, and functionality you built during the hackathon. Judges will be looking for clarity and ease to clearly identify what was built during the event. Failure to clearly identify what was built during the event will result in contributions will result in disqualification.

New Work Only: You may not submit projects that are **not** **Disqualified** if they were started before the hackathon. Pre-existing ideas, or projects that are being "ported" from other platforms, are strictly prohibited. Projects must be 100% new work created during the event.

Licensing: All final deployment on **Devpost** must be **MIT Licensed**.

- Three accounts are required to submit a project. Details shortly after the hackathon, so make sure you have access to your email.

Setup guide: Technical setup, deployment, and tips.

Google Provided Resources

Gemini Hackathon Starter: Gemini Hackathon Starter.

Participants will receive a $100 Google Cloud Platform account with unlimited quota for Gemini 3 Pro. Details on how to redeem the credits will be provided shortly after the hackathon.

- Access to **Gemini models** via Google Cloud Platform.
- Pre-configured environment for rapid prototyping.
- Support for multimodal inputs (text, image, video).

Vibe Code: Vibe Code with Google AI Studio.

- Vibe Code with Google AI Studio.
- Build and deploy full-stack applications from a single prompt.
- Integrated Gemini API access.
- Support for multimodal inputs (text, image, video).

Gemini Live Models: Gemini Live Models.

- Gemini Live Models.
- Real-time multimodal interaction.
- Support for audio and video streaming.

Vercel Provided Resources

- Vercel Starter
- vercel.com/new
- AI Templates on Vercel
- AI docs
  - v0
  - AI SDK
  - Agents
  - MCP
  - Integrations
- Vercel Platform Core Docs for building custom integrations, managing resources, deployments, and more
- Workflow DevKit
- vercel.com/ai-gateway
- vercel.com/docs/agents-with-ai

Partner-Provided Resources

Scaleform Resources

- $10 in Scaleform Credits. To redeem, sign up for Scaleform and receive your credits.

Elevenlabs Resources

- Credit Code: Rand-Is-Back-Zero

Submission Process

Submit a project page using Devpost. Ensure your project page has complete branding, in the form of a logo or a name. Include a short, clear video demo (2-3 minutes max). Provide a public GitHub repo. Include a clear, concise, and functionally that your team built during the hackathon.

Please double check that your repository is public and that the code is accessible, and all team members have been added to the submission.

Judging Process

Judging Period: Jan 26th - Feb 1st.

Mentors: Mentors will be available and evaluating your **technical demos** in person. Mentors will be available to answer questions and provide feedback on your project.

Judges: Judges will be reviewing submissions and checking to ensure your project was built during the hackathon and meets the previous specs as stated.

Judging criteria will be:

Source Code: Hackers will be assigned a random number and will be judged on the venue. Each team will have 3-5 minutes to present their work, followed by 1-2 minutes of Q&A. The judging criteria will be:

- Impact Potential (20%) — What is the real-world problem you are solving, and how significant is the impact? Does a long-lasting impact on the ecosystem? Is the target audience clearly defined? Does the solution address a big enough market?
- Live Demo (40%) — How well has the project been built? Is it functional? Does it perform as it is presented?
- Creativity and Originality (20%) — Has this concept been seen before? Does it offer a unique perspective or a novel approach? Are there novel innovations does it bring to the table? Does it solve a problem in a creative way?

Round Two: Top teams will be chosen depending on stages in front of a panel of judges. Teams will have 5-7 minutes to present their project, followed by 1-2 minutes of Q&A. The judging criteria will be:

- Technical Execution (40%) — How well is the project built? Is the code clean, scalable, and well-structured? Does the demo perform as it is presented?
- Impact Potential (20%) — What is the real-world problem you are solving, and how significant is the impact? Does a long-lasting impact on the ecosystem? Is the target audience clearly defined? Does the solution address a big enough market?
- Creativity and Originality (20%) — Has this concept been seen before? Does it offer a unique perspective or a novel approach? Are there novel innovations does it bring to the table? Does it solve a problem in a creative way?
- Presentation (20%) — How well did the team communicate their vision? Is the presentation clear, compelling, and well-structured? Does the presentation effectively convey the project's value?

Prizes

Prizes

- $1000 in GCP Credits
- $500 in Google Cloud Vouchers
- $500 in Gemini API Credits
- $500 in Vercel Credits
- $500 in Vercel Credits
- $500 v0 credits
- $100 AI Studio 12 months AI Gateway
- $1000 in Elevenlabs credits per team member
- $500 in Elevenlabs credits per team member
- $500 in Elevenlabs Pro for per team member
- $100 Elevenlabs credits
- $100 Elevenlabs credits
- $100 in Scaleform Credits
- $100 in Scaleform Credits
- $100 in Gamma Credits
- $100 in Gamma Credits
- $100 in Gamma
